DETAILED ACTION

Response to Arguments

Applicant's arguments, see Remarks, filed 5/28/07, with respect to claims 1-9 and 28-36 have been fully considered and are persuasive. The rejection of claims 1-9 and 28-36 has been withdrawn.

Allowable Subject Matter

Claims 1-9 and 28-36 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 1-9 and 28-36, there is no prior art of record that teaches an imaging layer comprising a monolayer of isolated LC domains said LC material having first reflecting state and second weakly scattering state capable of being interchanged by electric field wherein said domains of LC comprises a mixture coated as an emulsion to form the imaging layer a first population comprising a first max wavelength and a second population having a second max wavelength wherein the difference between the first and second maximums are at least 50 nm apart.

The references as previously cited do not disclose a mixture between two liquid crystal populations as coated as an emulsion which requires a mixture of two separate max wavelength LC populations within a single pixel while maintaining a monolayer. The prior art discloses monolayers of liquid crystal having separate populations per pixel however these do not disclose a monolayer mixture coated as an emulsion.
